Web Designing Training in Patna

Web Designing is evergreen technologies which will be present our information to the whole web world. Our **Web Designing Training in Patna** provides End to End support. It's really an art while creating a full-fledged Website of a client or for a product. If a website's design is not up-to the standard it will get very minimum impact to the specific audience.

Our Trainers for Web Designing is famous freelancers and corporate experts. They are working for many multi-billion dollar companies and they know the international standards in web designing. By using the experience of them anyone can learn the basic to complex level website designing in short time period.

Web Design is not just creating web pages to display some image and content. We have to analyse the purpose of that website first. After reviewing the purpose we can have an idea about what we are going to do with that website. Then we have to mix the perfect composition of ideas and creativity into that to build a solid new website for clients. Each a every project should be unique. It will add some more advantage to your portfolio. We are the **Best Web Designing Training Institute in Patna** with complete structured syllabus. It will match each and every Web Design Companies or Digital Interactive Agencies in Patna.

Web Designing Training is combination of both design and development of a website.

Web Designing Training Syllabus

Our Web Designing Training Syllabus covers from basic introduction of web to the perfect dynamic creation of CMS [Content Management System] using PHP.

HTML Training

HTML is the basic requirement of any web application or websites. So, students who want to be a perfect web design and developer must strong in the basic part. We will give the clear cut knowledge of HTML Tags and usage of Tags in practical manner.

[HTML Training Syllabus](#)

CSS Training

Without CSS knowledge no one can able to design professional web layouts. CSS part is going to help the web designer in defining the styles of each HTML Tags. There are many types in CSS. Our Web Designing Training in Patna will discover all the aspects in CSS Zone.

[CSS Training Syllabus](#)

PHP Training

After getting enough knowledge in static designs we started to train the students in dynamic languages. We chose PHP and MySQL for that. Reason for that is simple. PHP is the most powerful front end dynamic language in this world. So, by using PHP Training our students convert the static designs into dynamic websites.

What is MySQL Database?

MySQL is a fast, easy-to-use RDBMS used being used for many small and big businesses. MySQL is developed, marketed, and supported by MySQL AB, which is a Swedish company. MySQL is becoming so popular because of many good reasons.

- MySQL is released under an open-source license. So you have nothing to pay to use it.
- MySQL is a very powerful program in its own right. It handles a large subset of the functionality of the most expensive and powerful database packages.
- MySQL uses a standard form of the well-known SQL data language.
- MySQL works on many operating systems and with many languages including PHP, PERL, C, C++, JAVA etc.
- MySQL works very quickly and works well even with large data sets.
- MySQL is very friendly to PHP, the most appreciated language for web development.
- MySQL supports large databases, up to 50 million rows or more in a table. The default file size limit for a table is 4GB, but you can increase this (if your operating system can handle it) to a theoretical limit of 8 million terabytes (TB).
- MySQL is customizable. The open source GPL license allows programmers to modify the MySQL software to fit their own specific environments.
